Nationality: Filipino | Date of birth: 05 Dec 2005 | Marital status: Single

ABOUT ME

Incoming 3rd-year IT student with a strong foundation in programming and problem-solving, eager to gain hands-on experience in the tech field. Proficient in C, Java (OOP), and Python, with exposure to schema design, database creation, and cloud platforms such as AWS. Adept at working under pressure, with excellent time management and adaptability to new environments. CHED Merit Scholar since freshman year, consistently maintained through academic excellence.

ACADEMIC & TECHNICAL PROJECTS

Project Lead – Enterprise Network Architecture | Cisco Packet Tracer

- Spearheaded the design and implementation of the Spanning Tree Resort enterprise network, integrating access, core, and edge layers.
- Applied in-depth knowledge of Cisco networking concepts (VLANs, STP, HSRP, EtherChannel, DHCP relay, OSPF) to build a secure, fault-tolerant topology.
- Configured Cisco routers, switches, and ASA firewall to enable inter-VLAN routing, NAT/PAT, and guest isolation policies.
- Validated the design through structured testing procedures, ensuring zero downtime and secure guest access.

PUPwesto Application Prototype | Figma, UI/UX Design, Wireframing

- Contributed to the high-fidelity prototype development, refining layouts, navigation flows, and interactive elements to ensure usability and accessibility.
- Gained hands-on experience in both low-fidelity wireframing (structuring user journeys, task flows, and interface sketches) and high-fidelity prototyping (polished visuals, interactive components, and design systems).
- Developed expertise in Figma for collaborative design, component creation, prototyping flows, and variant management, applying industry-standard UI/UX practices.
- Strengthened understanding of user-centered design by translating conceptual wireframes into functional, testable prototypes that aligned with project goals.

Exploratory Data Analysis: Student Habits | R, Statistical Analysis

- Conducted exploratory data analysis on student behavioral datasets using R.

SALN Submission Portal | MySQL, Python Flask (Backend), JavaScript, HTML, CSS, Gemini Pro

- Helped design and manage the database schema in MySQL, ensuring proper table structures and relationships.
- Wrote and optimized SQL queries for data handling, retrieval, and submission processes.
- Supported backend integration with Python Flask, connecting the database to the web application.
- Strengthened skills in database management and query optimization while collaborating on a full-stack system.

EXTRA-CURRICULAR ACTIVITIES

Documents Head | AWS Cloud Club, Polytechnic University of the Philippines | Manila **Oct 2025-Present**

- Led the Documentation Subcommittee of AWS Cloud Club – PUP, managing official records, reports, and creative content to ensure consistent, high-quality documentation across all events.

Deputy Head in Programs and Activities Committee | Institute of Bachelors in Information Technology Studies | Manila **Sep 2025-Present**

- Assisted in planning, organizing, and executing programs and activities.
- Coordinated with committee members and volunteers for smooth event operations.

EDUCATION

High school diploma | STEM Strand | Lagro High School | Quezon City **2022**

- Recognized for excellence through multiple academic merit achievements
- Graduated with highest honors, demonstrating top-tier academic performance

Bachelor of Science in Information Technology | Polytechnic University of the Philippines | Manila **Present - 2028**

- Developed programming and software development skills through coursework and projects, emphasizing problem-solving and logical thinking essential for an Entry-Level Software Engineer.
- Gained hands-on experience by designing an app that meets user-friendly standards, developing a database, and creating a website for it, which helped foster and enhance skills.

SKILLS

Software Development Lifecycle | Object-Oriented Programming (Java) | Data Structures & Algorithms | Version Control (Git) | Web Development Basics (HTML & CSS)| C Language | Python | Database Management | Ability to work under pressure | Good with people | Time Management | Adapts to any environment | Problem-solving skills

COURSES

Understanding Cloud Computing | Data Camp **Apr 2025**

Intermediate Python | Data Camp **Jan 2026**

Introduction to Java | Data Camp **Jun 2026**

Intermediate Git | Data Camp **Jul 2026**
